CELLULITE REDUCTION

This combination treatment smooths cellulite by breaking down fibrous bands (ZWave acoustic therapy) and tightening skin with radiofrequency energy (Exilis Elite). Together, they help reduce dimpling and improve skin texture on areas like the thighs, buttocks, and hips.

Results

What to Expect

Treatments feel warm, similar to a hot stone massage, and typically take 90 minutes per area. You may notice mild redness that fades quickly, with no required downtime. A series of 5 sessions is recommended for optimal tightening and long-lasting results.
