LASER HAIR REMOVAL

Laser hair removal targets hair follicles to reduce unwanted growth on the face, underarms, legs, bikini line, and more — for smoother skin with longer-lasting results than shaving or waxing.

What to Expect

Treatments are quick and feel like a mild snapping on the skin. You may notice slight redness or sensitivity, but most patients return to normal activities right away. Avoid sun exposure and retinol use on the area before treatment. Multiple sessions, typically a total of 6 spaced 4-6 weeks apart are recommended.
