Labs + Treatment

Depending on symptoms, **bloodwork may be recommended:**

- Providing your own recent labwork (within the past 6 months)
- Getting labs in-office and billing insurance*
- Getting labs in-office and paying out of pocket
- Recieving a lab order* at your first visit to complete elsewhere

Treatment will be determined and discussed with you upon review of your labwork. You do not need to pay for an additional visit to start treatment, but routine future visits will be required for refills / additional monitoring.

**Our office does not have any way to determine or guaruntee insurance coverage*
